Inventory and Fulfillment: Demand Forecasting, Replenishment, Inventory Optimization, Dark Stores, Marketplace Operations, Omnichannel Fulfillment, Order Management, SLA Management

Product Leadership: Product Roadmaps, Phased Rollouts, PRDs, OKRs, North Star Metrics, Team Leadership, Cross-functional Alignment, Stakeholder Communications, Post-production Support, Agile, Scrum

Data and Tools: SQL, Operational Dashboards, KPIs, ML Productization, AI Agents, Jira, Confluence

PROFESSIONAL EXPERIENCE

Lead Product Manager | Blibli (Blibli.com) | Bengaluru, India **Oct 2022 – Present**

- Cut dock-to-stock time per pallet 42% (60 to 34 minutes) and improved outbound SLA 12% in dark stores, and cut dock-to-stock 32% with a 4% outbound SLA gain in marketplace and omnichannel warehouses, by leading a WMS mobility solution across 3 business models with the same headcount.
- Led a 9-person mobility program team (2 PMs, 2 UX designers, 3 backend and 2 frontend engineers): phased rollout starting with dark stores, scan-first workflows, PRDs, OKRs against an operational efficiency north star, and a post-production feedback loop. Now used by ~300 associates on ~100 devices across 16 dark stores, with 96% of operational workflows on mobile.
- Won a grocery client with a USD 4M+ (~72B IDR) annual contract by launching grocery and fresh capabilities in the WMS and mobility apps: item-level attributes, spare and LPN management, chamber-based putaway, picking, outbound staging and handover, MD preference rules, and automatic inventory flushing by expiry date.
- Led a 15-person grocery and fresh program team (2 PMs, 2 UX designers, 8 backend and 3 frontend engineers) to go-live in April 2026 across 16 Jabodetabek dark stores handling 35,000 transactions a day (60,000 at peak), raising on-time handover to logistics from 87% to 96%.
- Cut out-of-stocks on customer-searched SKUs 24% and raised outbound SLA from 93.6% to 97.2% across 8 warehouses and 20,000+ active SKUs by partnering with Data Science on demand forecasting that triggers replenishment, directed putaway and bulk-to-pick-face moves, with human approval.
- Increased fulfillment capacity 5x (2,000 to 10,000 order items per hour) and improved SLA 7–11% from an 85% baseline by delivering conveyor belt integration; reduced orders stuck for lack of pick-face stock from 8% to 3.6%.
- Built labor planning that tracks picker and stock-control productivity, task auto-assignment, inbound calendar slotting for supplier deliveries and outbound wave slotting.
- Saved 16.8B IDR a year in licensing costs by enabling omnichannel execution on Blibli’s in-house platform for an internal client, replacing a licensed third-party system.
- Reduced production issue tickets from 120 to 80 a month with a self-help portal for SKU data corrections, and improved incident SLA turnaround 44% with an AI agent that resolves 54% of incidents; lead and mentor 2 Product Managers and 2 Product Analysts.

Product Manager – Warehouse Management System | Flipkart | Bengaluru, India **May 2021 – Oct 2022**

- Improved picking efficiency 20% (order items picked per hour) across 16+ fulfillment centers by co-designing inventory placement algorithms with Data Science.
- Grew self-serve inventory dashboards to 500+ active internal users by iterating on post-launch feedback from warehouse and operations teams.
- Saved 16 hours of manual effort per week by replacing a manual SOX audit workflow with a compliance dashboard.

Product Consultant | KPMG India | Kolkata, India **May 2019 – May 2021**

- Reduced compliance costs 30% (audit effort, tool licenses and staffing) for 8 organizations by implementing ISO 27001 and SOX control frameworks.
- Turned IT maturity and cybersecurity risk assessments for 8 government departments into phased technology roadmaps.
- Managed and mentored a team of 3 (1 Senior Analyst, 2 Analysts); delivered Fortune 100 client releases with 2 or fewer high-impact UAT issues.

Software Development Engineer | IBM | Bengaluru, India **Aug 2014 – May 2017**

- Built and shipped iOS applications and backend services for enterprise clients.
